# Add device

Alpha Smart app · https://faqdoc.info/en/systemauswahl/alpha-smartware-en/alpha-smart-app-en/how-do-i-add-an-oem-alpha-smartware-device-in-the-oem-alpha-smart-app/

### How do I add an OEM Alpha smartware device in the OEM Alpha smart app?

To add a device to the app, there’s an installation assistant for each device. Basically, you need the serial number, an EAN code and a claiming code for a cSP-L device (see question: What does claiming mean and why is this step necessary?) to carry out the installation. There are several ways in the app of transferring this information.

- Scan the QR code on the sheet in the packaging. The QR code has all the data required to add the device to the app. This is the quickest method.
- Manuelle Eingabe von EAN-, Seriennummer und Claimingcode.
