Scan QR code

Alpha Smart app · https://faqdoc.info/en/systemauswahl/alpha-smartware-en/alpha-smart-app-en/what-happens-if-i-scan-the-qr-code-with-the-standard-qr-code-app-on-the-smartphone/

What happens if I scan the QR code with the standard QR code app on the smartphone?

If the QR code on the sheet or device is scanned with the standard app, it depends whether the OEM Alpha smart app is already installed on the smartphone.

Once the app is installed, the scanned information is forwarded to the app and you can start operating the device straight away. If the app isn’t yet installed on the smartphone, you’ll be directed to the relevant store so that you can install the OEM Alpha smart app.
