Data security

Alpha Smart IoT gateway · https://faqdoc.info/en/systemauswahl/alpha-smartware-en/alpha-smart-iot-gateway-en/is-data-transmission-secure/

Is data transmission secure?

The OEM Alpha smart system meets stringent data-privacy requirements. Communication between the wirelessly connected Alpha smartware devices and the Alpha smart cloud is encrypted to the AES-128 standard.

Subsequent data management is carried out in a German data centre that is compliant with German data protection regulations and the GDPR.
