Alpha Smartware Base Station – Downloads

Alpha Smart system downloads · https://faqdoc.info/en/systemauswahl/alpha-smartware-en/alpha-smart-system-downloads-en/alpha-smartware-base-station-downloads/

The Alpha Smartware Base Station is the central connection and control unit for precise centralized room-by-room temperature control system of surface heating systems. The Base Station processes the registered target and actual temperatures of connected Alpha Smartware room control units.

According to this information, the rooms are always set to the specified temperature via the connected thermal actuators. Alpha Smartware components can be installed and operated standalone without an Internet connection. Alternatively, there is the possibility of expansion and integration into the cloud based Alpha Smart Home System and thus an intelligent control and individual configuration via Alpha Smart App.

CE Declaration of Conformity, Alpha Smartware Basis | BSS 21001-xxN2: http://asw-basestation.compliancedoc.info

Quick Install
