Alpha smart system

Alpha Smart system · https://faqdoc.info/en/systemauswahl/alpha-smartware-en/alpha-smart-system-en/what-is-the-alpha-smart-system/

What is the Alpha smart system?

The Alpha smart system is our own smart home solution for detached houses and commercial buildings

A full portfolio of hardware (Alpha smartware), a cloud solution (Alpha cloud) and an app (Alpha smart app) allows customers to make their homes digital.

For the market launch, this smart home system is a basic range with all components required for intelligent, wireless control of water-based panel heating. In the future, further components will be gradually added to this basic range so that it becomes a full one.
